

# WORLD'S MOST ULTIMATE<sup>st</sup> ASO CHECKLIST

# APP NAME

START HERE

Do you rank 1st for your exact app name?

YES

NO

Is someone intentionally copying your app name to piggyback on your traffic?

YES

NO

File a complaint with Apple. Even if you don't have a trademark for it, but you were the first to launch your app with this name Apple should force the copycats to stop stealing your users.

Unless it's \*you\* who are the copycat of course, then just stop it, seriously :)

Do you have keywords in your app name?

YES

NO

Your app name might be too generic, make it unique so that users can easily find you.

Do you rank high enough for them (like top 20 at least)?

NO

YES

Consider targeting less competitive keywords. Try a service like [ASODesk.com](https://www.asodesk.com/) to research new search terms and monitor your positions.

Add most common misspellings to your meta keywords so that users can find it even if they don't spell the name correctly.

If character limits allow it, consider adding a descriptive part to your app name with your major keywords. As in «AppName: Best Keyword1 and Keyword2 Free»

Is your app name easy to spell and pronounce?

YES

NO

Is it too late to change it?

YES

NO

Start running your own search ads, you should be able to outbid your competition due to higher relevance.

You can automate your Search Ads campaigns with a service like [SearchAdshq.com](https://www.searchadshq.com/)

Is someone else running search ads for your app name?

YES

NO

See if you can minimize the ambiguity and complexity of your app name to make sure you leverage word of mouth and virality to the fullest.

# ICON

**START HERE**

Is your icon easily recognizable?

**NO**

**YES**

Does your icon convey an idea of what the app is about?

**NO**

**YES**

Does your icon look good against light and dark background?

**NO**

**YES**

Does your icon stand out against competition?

**NO**

**YES**

**MOVE TO  
NEXT SECTION**

Make a list of things you can add to make it more recognizable and experiment: shapes, colors, frames, symbols, etc. If you have a portfolio of apps you can add a branding element to all icons.

See how you can make it more appealing regardless of environment.

Figure out how you can make your icon more representative of your app's main features.

See how you can make a difference: contrasting colors, different shapes or adding a frame can help. Check out apps from other categories for inspiration.

Use a tool like [SplitMetrics.com](https://splitmetrics.com) to run an A/B test and see how you stack up against competition.

Be sure to run an A/B test before you roll out any significant icon changes to the App Store

[SplitMetrics](https://splitmetrics.com) is a great way to safely test your ideas

# SCREENSHOTS

START  
HERE

Can users understand what your app does by only looking at your first two portrait or one landscape screenshot?

NO

The first two screenshots are critical because that's what users see above the fold on the app page and in search results. Make sure you make a good first impression.

Make use of all screenshot slots available. Each screenshot is an opportunity to convince users to download your app.

YES

Are you using all 5 screenshots?

NO

YES

Are all your screenshots of the same orientation?

NO

While they can stand out, mixed screenshots can also waste a lot of space on you app page and in search results, so consider opting for one orientation (run an A/B test to see which one). Never make second screenshot landscape if the first one is portrait!

Highlight your app's main benefits and selling points with legible high-contrast text. On top or at the bottom of the screenshot is the usual placement, but you can experiment.

YES

Do you have caption texts in your screenshots?

NO

YES

Are they short, easily readable and understandable?

NO

People don't read, they scan. You only have a few seconds to get your point across, so make your captions concise. And by all means have a call to action!

Take a look at your analytics and prioritize localizing for the languages/countries where you have most traction.

Use a service like [Softlotion.com](https://softlotion.com) if you also need to localize content within the app.

YES

Have you localized your screenshots?

NO

YES

Are you sure that you've really localized them, not just translated the captions?

NO

Always have a native speaker who understands the culture review your messaging and change the brand's tone if needed.

The goal of your screenshots is to score an install, so focus on the good stuff and showcase the value, not your sales funnel.

YES

Do you feature any login, registrations, purchase forms or ads in your screenshots?

NO

Lose them. Get right down to business and describe your app, you can welcome your users once they download and launch.

Try switching to simpler backgrounds so that the main focus is on the app. Too much detail in the background distracts attention from where you really want it.

YES

Do you have any 'Welcome' type screenshots?

NO

Do you have sophisticated background images with many details?

NO

Is your app a game?

NO

Do you feature devices in your screenshot?

NO

Try prominently showcasing your cutest (or most dreadful) characters in your screenshot images. Experiment and see which ones perform best.

Do you feature your characters in your screenshots (assuming you have characters that is)?

NO

YES

Try adding a device and showcase your app in action (e.g. someone taking a photo with your selfie app).

Run A/B tests to see which ones yield highest conversion rates.

The best way to test this is via [Splitmetrics.com](https://splitmetrics.com)

Have you tested which characters work best?

NO

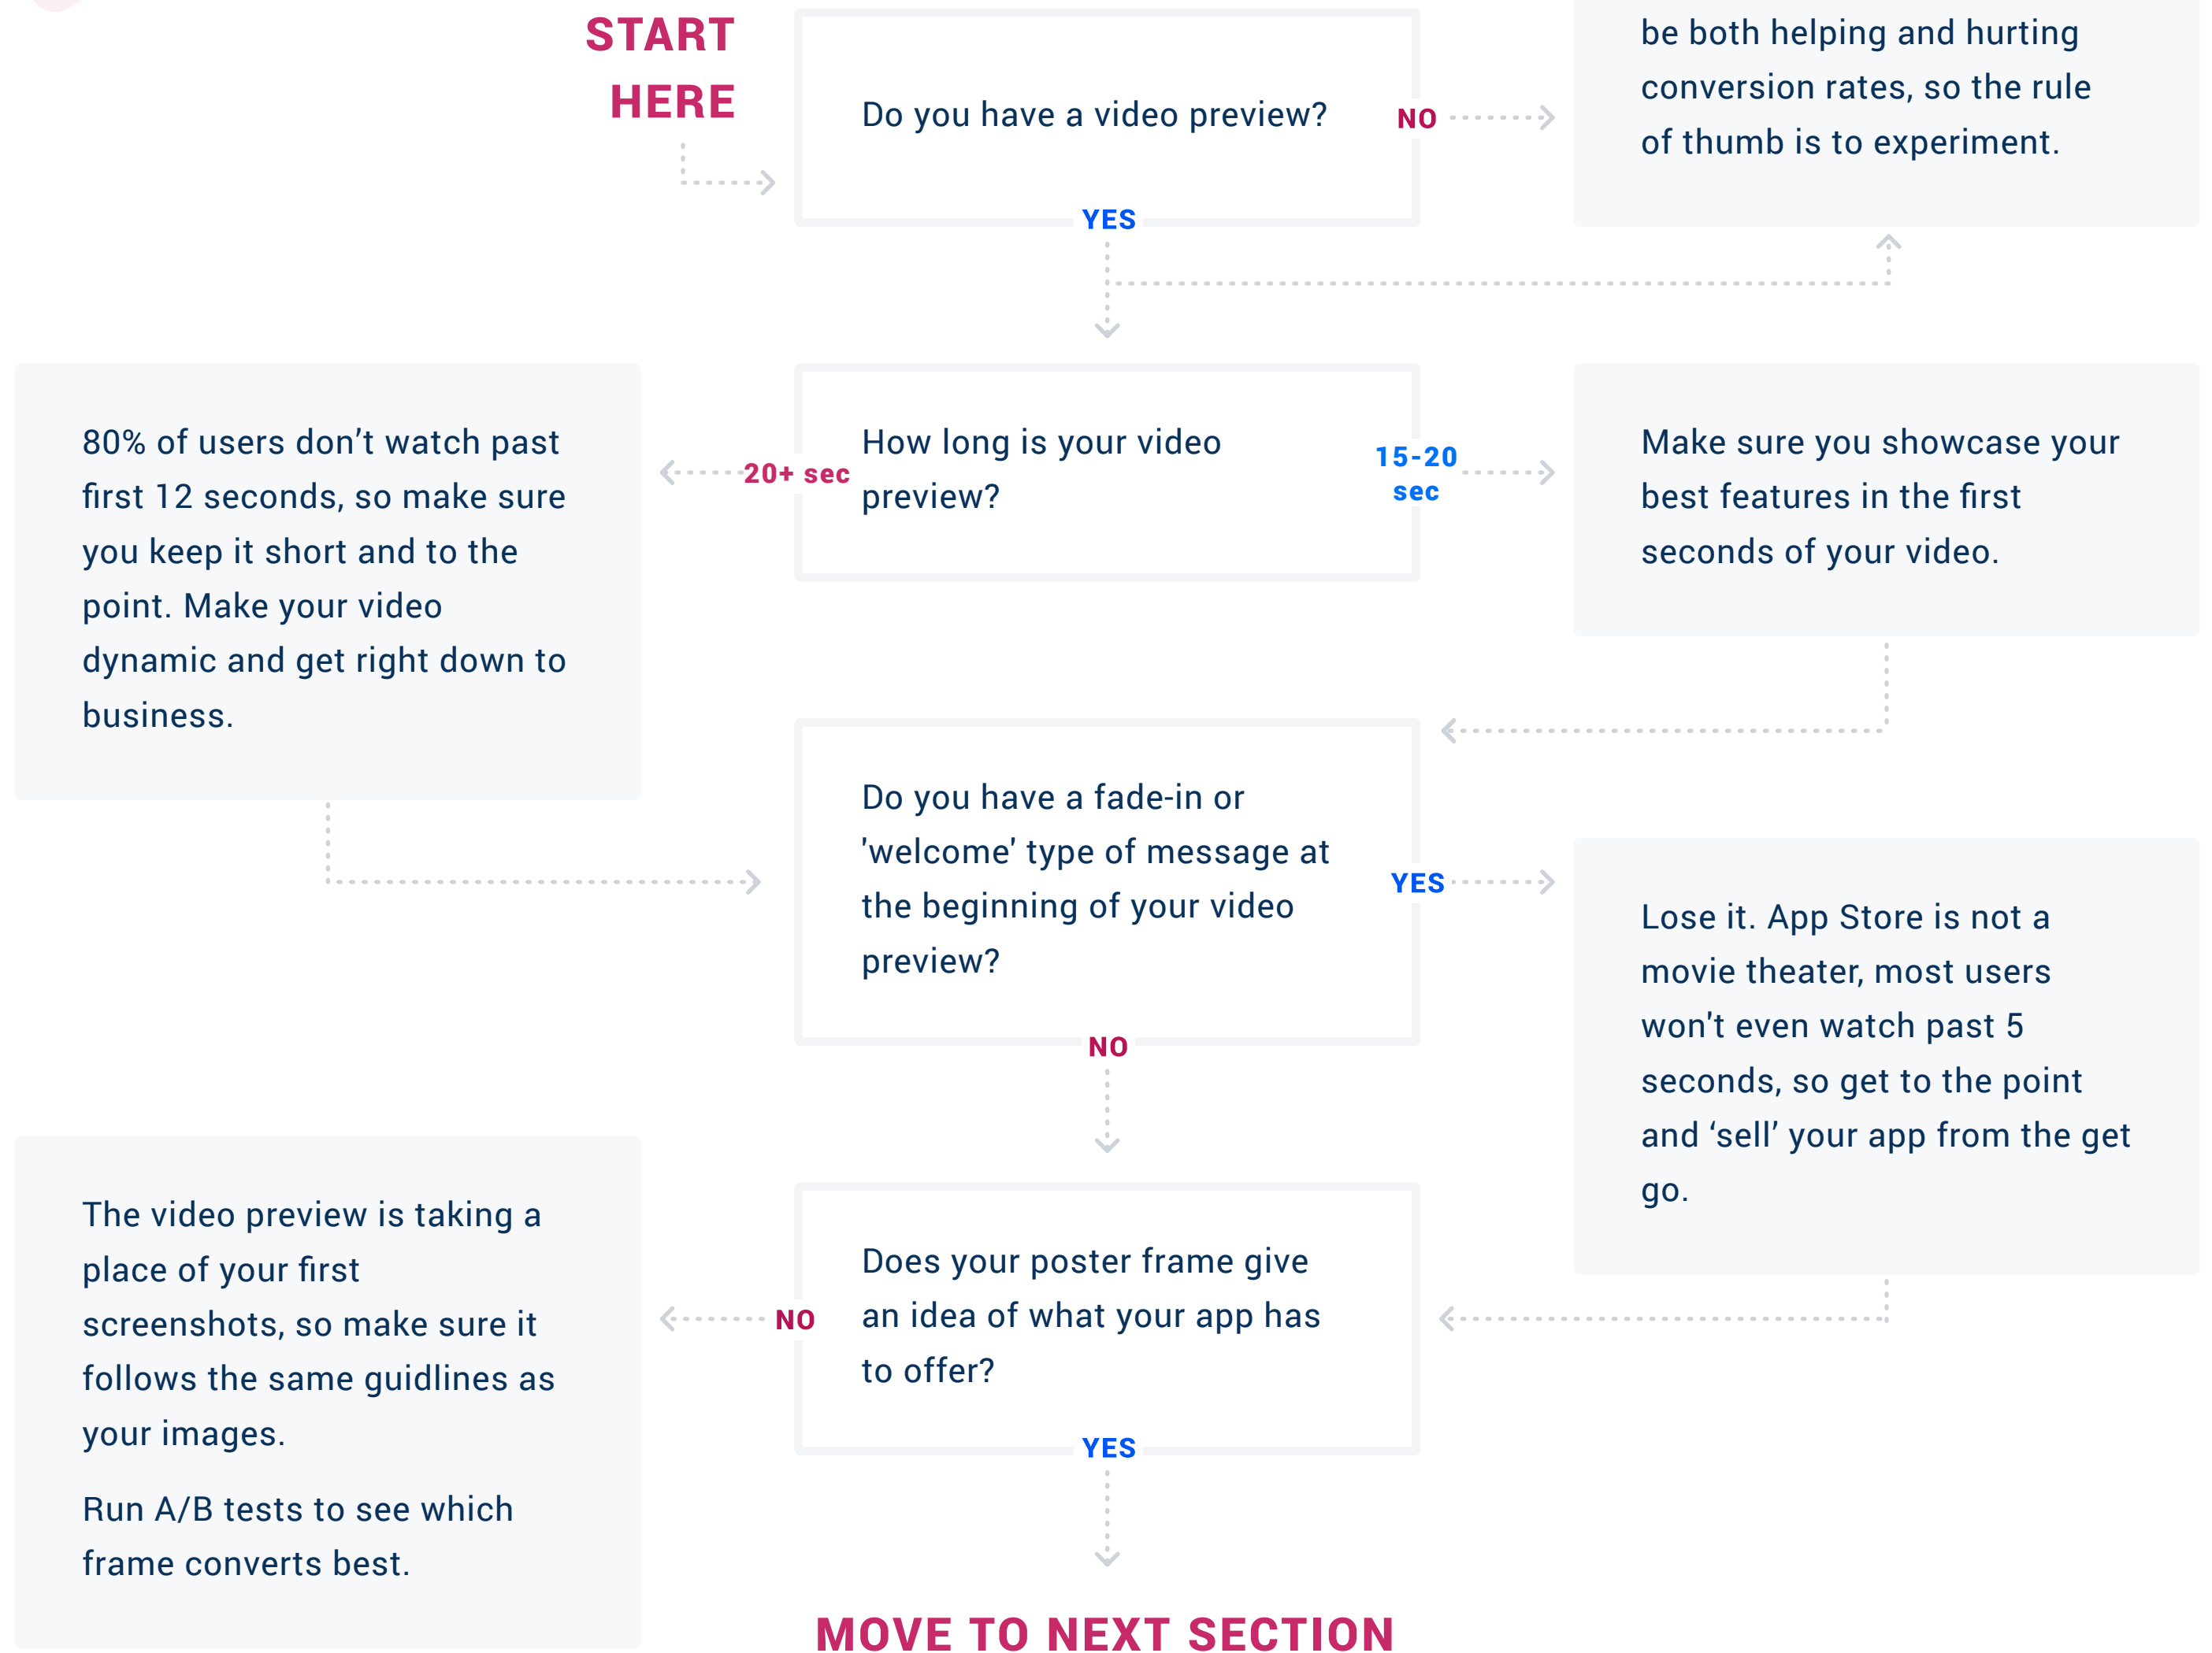

YES

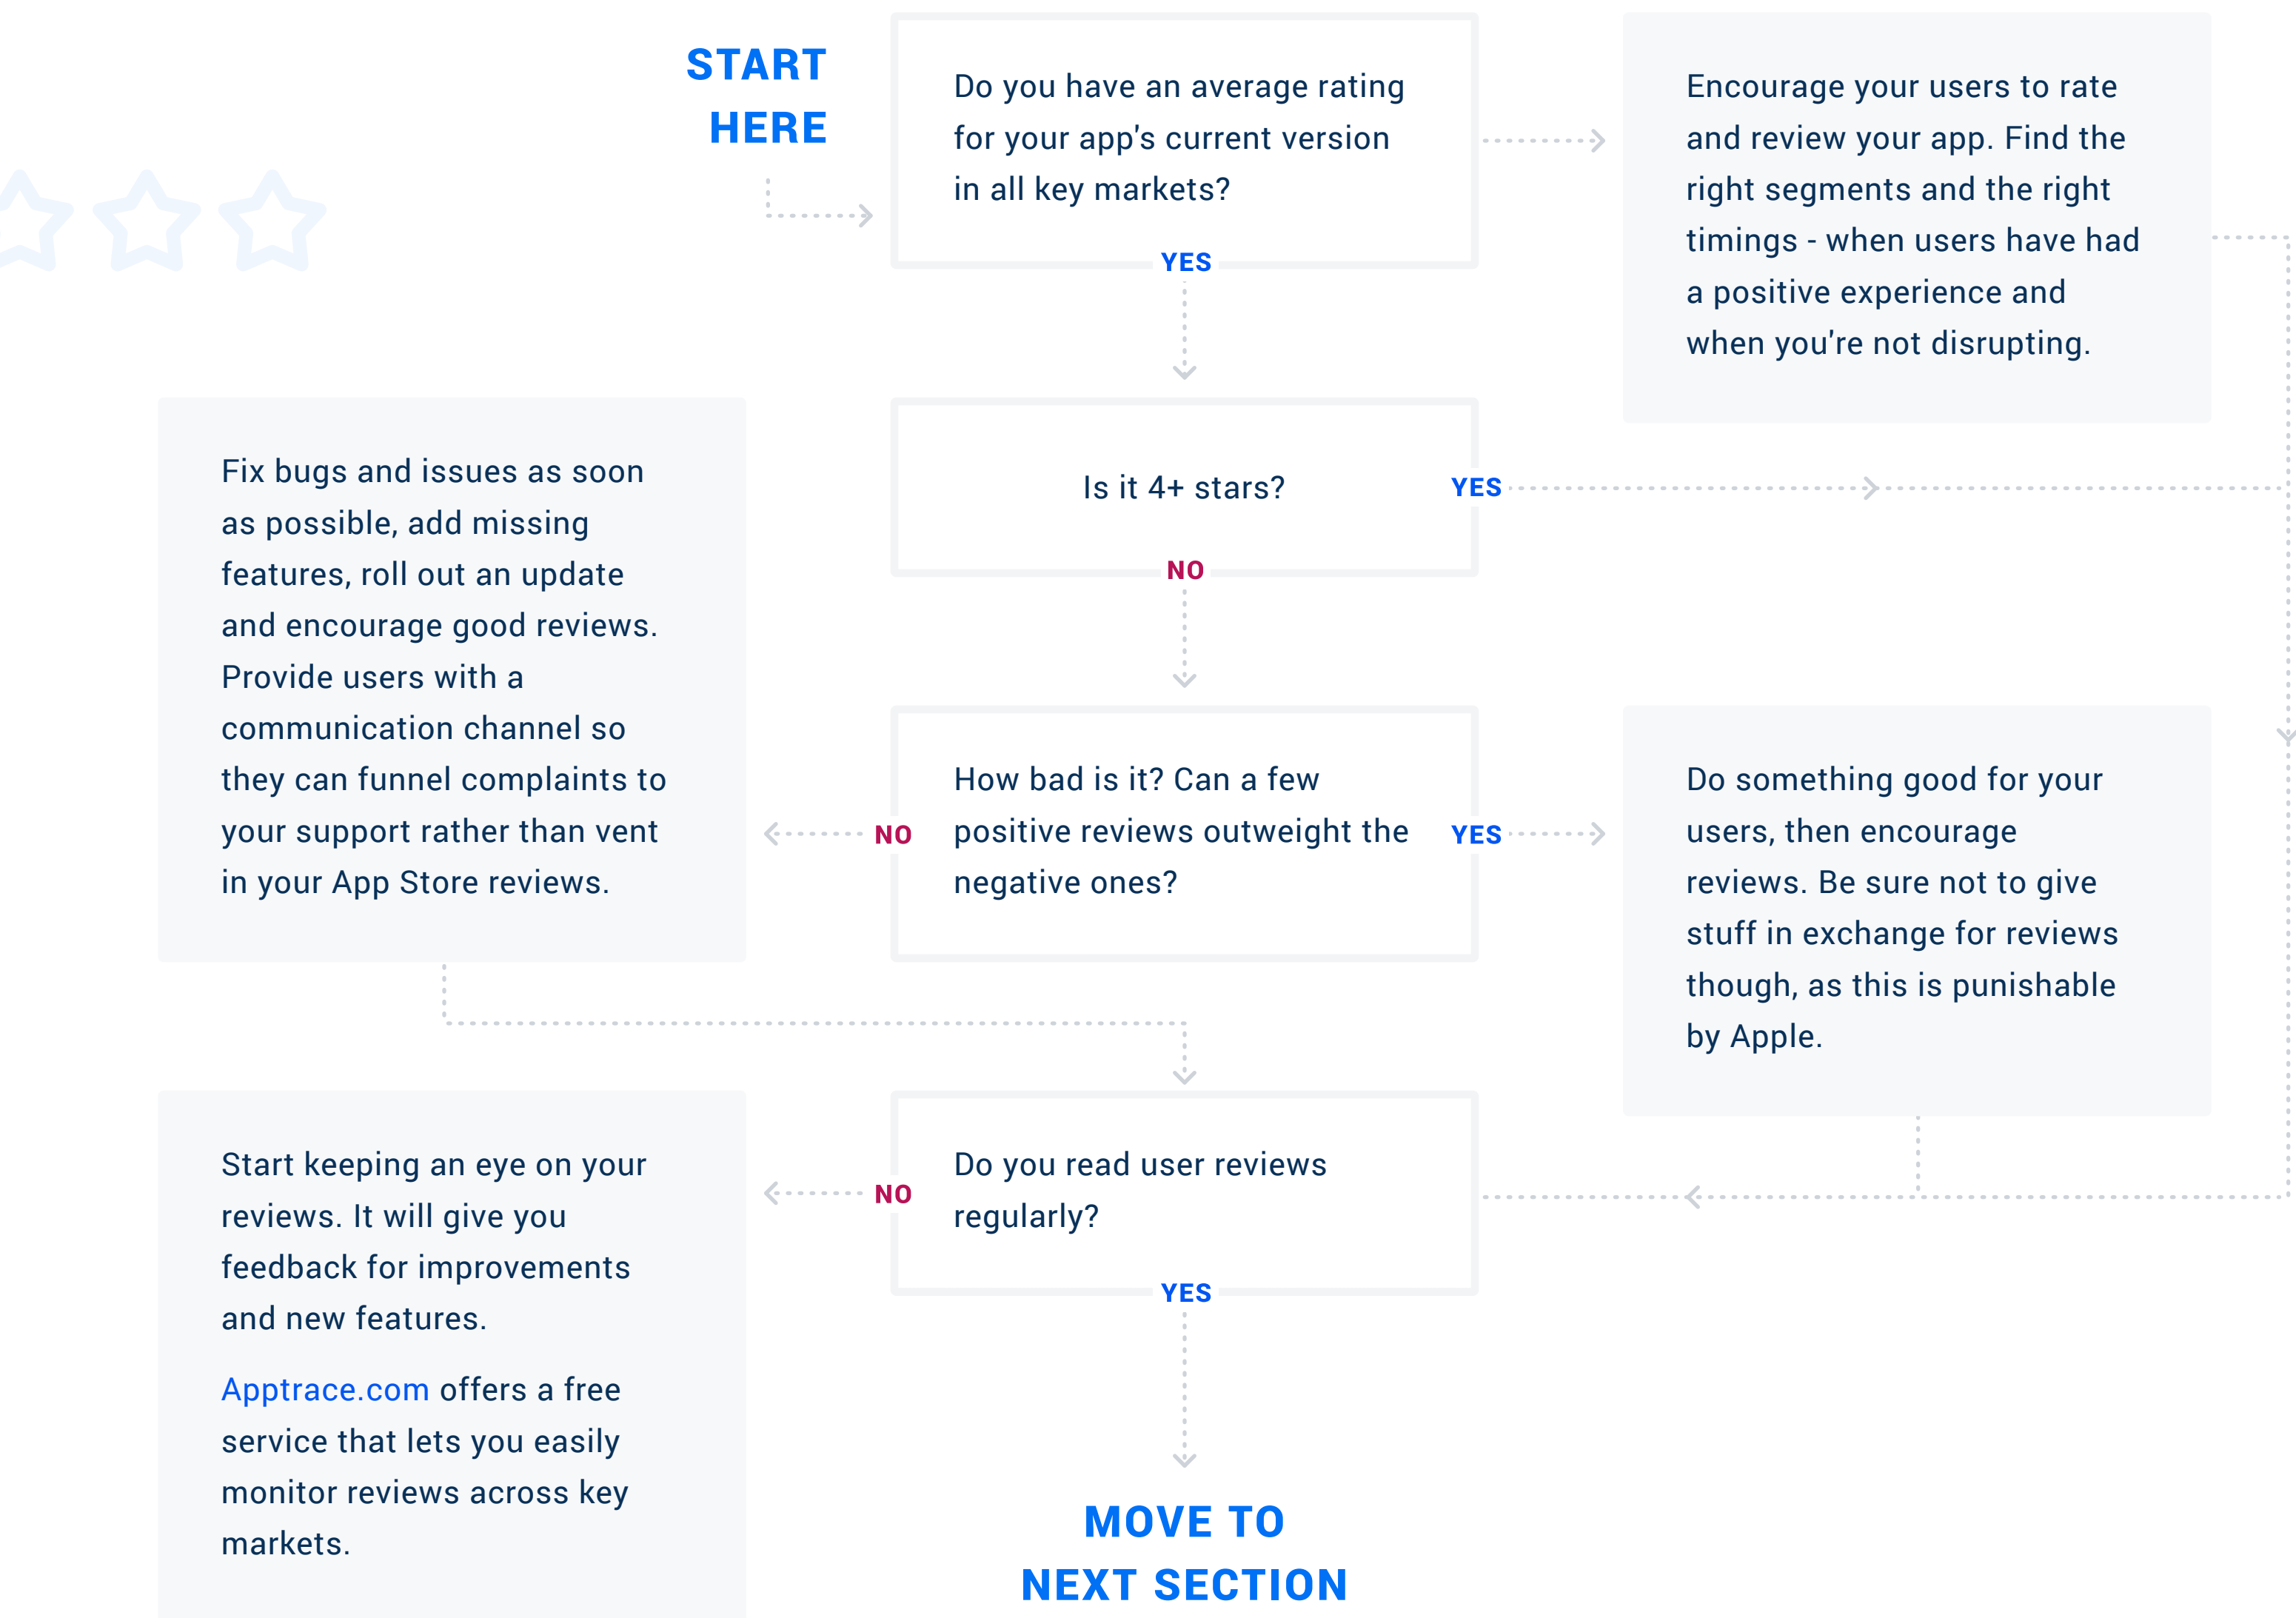

Be sure to run an A/B test before you roll out any significant screenshot changes to the App Store. [SplitMetrics](https://splitmetrics.com) is a great way to safely test your ideas

# VIDEO PREVIEW

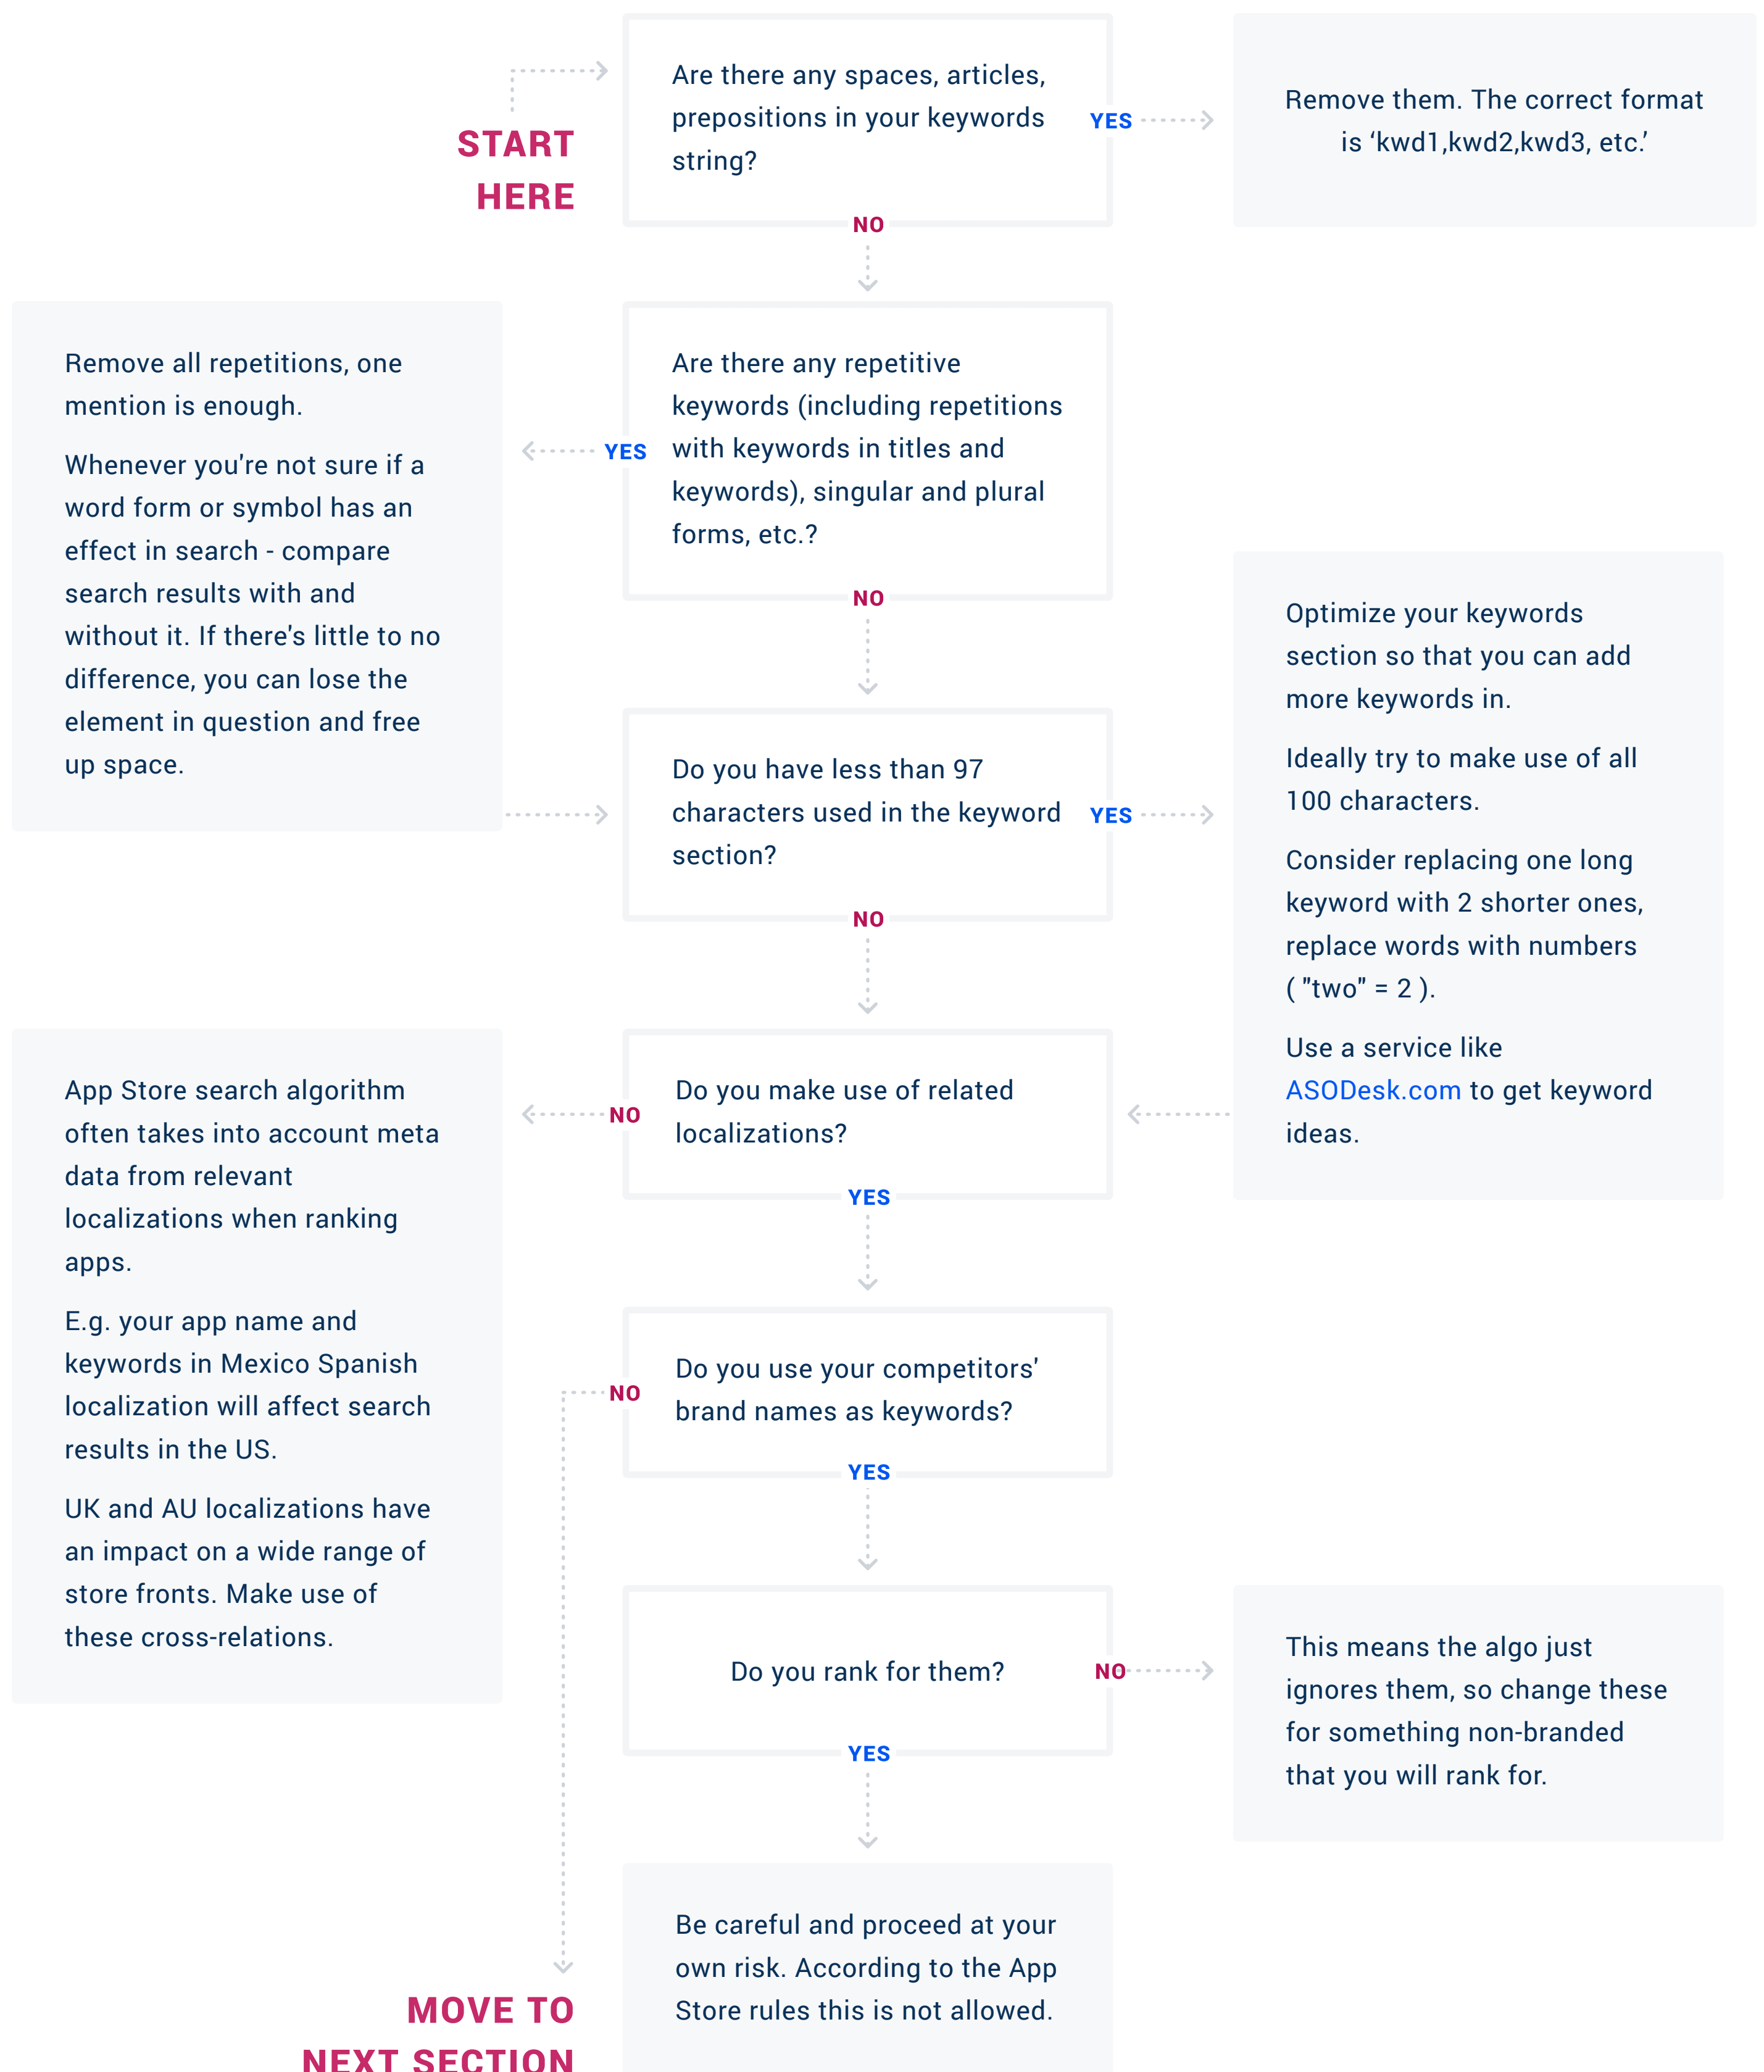

# 📌 RATING & REVIEWS

# KEYWORDS

# DESCRIPTION

**START  
HERE**

Do your users need to hit the  
"... more" link to find the core  
value of your app?

**YES**

Less than 2% of users actually  
open the full description.  
Rewrite your description so  
that the text above the fold  
convey the value proposition.

**NO**

Is your short description  
scannable?

**YES**

Make it easy to read. Use  
bullet lists of your key  
features or any other way that  
can help you grab readers'  
attention and help get the  
point across fast.

**NO**

Does your above the fold  
description contain blank lines  
and interrupted sentences?

**YES**

Don't waste any space here.  
Revise it and make sure the  
most vital ideas you address  
your users are not cut off - on  
mobile you have 252  
characters visible before the  
"... more" link.

**NO**

Do you have a call to action  
(CTA) above the fold?

**NO**

Add one!  
  
This is both an example of a  
CTA and our advice ;)

**YES**

Do you stuff your description  
with keywords?

**YES**

There's no valid evidence that  
description is indexable by App  
Store search algo, so focus on  
users, not search bots (note:  
this doesn't apply to Google  
Play - your description affects  
search there)

**NO**

Have you localized your  
description?

**NO**

Take a look at your analytics and  
prioritize localizing for the  
languages/countries where you  
have most traction.

Use a service like [Softlotion.com](https://www.softlotion.com)  
if you also need to localize  
content within the app.

**YES**

Are you sure that you've really  
localized them, not just  
translated?

**NO**

Always have a native speaker  
who understands the culture  
review your messaging to fit in  
and change the brand's tone if  
needed.

**YES**

NEXT SECTION**

# WEBSITE

**START  
HERE**

Do you have a link to your website from your App Store page?

**NO**

Put a link to your website. Pro tip: use both developer site and support links and point them at different pages of your website (or different websites) to help with SEO.

**YES**

Do you have a link to your app from your website?

**NO**

Link to your app from your website.

Use smart banners to drive installs and text links with relevant keywords in anchor texts to help your app rank higher in Google web search.

**Pro tip:** build links to your app page from other websites and always link to the canonical page (look it up in html source code).

**YES**

Do you use rich mark up on your website?

**NO**

Associate your app with your website by adding rich markup meta tags for Facebook open graph, Twitter cards and Google+ structured data.

**YES**

Do you have content-based app?

**NO**

This will help drive additional traffic to your app whenever your site is mentioned on social media.

**YES**

Do you use app-indexing?

**NO**

Consider adding app indexing markup to help surface your app in search results both on device and in Google search. (See App Search Programming Guide and Google Firebase Indexing)

**YES**

What was your last time when you updated your app?

**more than 6 months ago**

Try to regularly update your app as it adds features and gives you additional chances of getting featured.

**not long ago**

Moreover every new update gives you an opportunity to update your ASO strategy.

**MOVE TO  
NEXT SECTION**

**START  
HERE**

Is your app published  
worldwide?

**NO**

**YES**

Consider making your app  
available worldwide unless there  
is a good reason not to, like  
licensing or operational limits.

Make sure you don't forget to  
localize the copy on your  
screenshots and screenshots  
itself.

Are your store listings  
localized?

**YES**

**NO**

If you are just getting started,  
focus on your core market  
language. Consider localizing  
your meta data with your next  
app version release.

Is your app size over 100Mb?

**YES**

Well some things are meant  
to be big, so no worries.  
However, always remember  
to check the 'Wifi only' option  
when buying ads.

Is the size significantly bigger  
than 100Mb?

**NO**

**YES**

Consider compressing some  
of the graphical assets or  
make some of the content  
downloadable after install to  
make your app below 100Mb  
so it can be installed via  
cellular connection.

# ANALYTICS

**START  
HERE**

Do you have an analytics SDK in place?

NO

Understanding your users is critical, so make sure to have at least basic analytics.

YES

Are you tracking all major events?

YES

Make sure that you know exactly what you're tracking and why, focus on actionable data and don't get trapped in vanity metrics.

NO

Most analytics solutions cover the essentials out of the box, but do spend time to also tag the events specific to your app.

Are you planning to run paid user acquisition?

NO

Getting users is hard, so even if you're not planning to run ads you might have to eventually. Always have a plan B.

YES

Do you have a mobile attribution SDK?

NO

Having a mobile attribution partner will let you advertise across multiple ad networks with a single SDK while giving you extra insights and analytics.

YES

Make sure that you pass key events over to ad networks that have built-in optimization algos (like Facebook) - this way you can optimize towards actions that matter to you.

[Adjust.com](https://www.adjust.com) is a great option to get started.
